Dquadrant

YOUR TRUSTED WEB3 DEVELOPMENT PARTNER

🚀 Pioneering Cardano Development Since 2017

🛡️ Scalable, Secure & Reliable Solutions

🌐 Netherlands-based with offshore facility

Excellence • Integrity • Innovation

⭐ COMPANY HIGHLIGHTS

📈 KEY METRICS

- Active in Web3 since 2013
- Founders combined expertise 45+ years in IT
- Specialized Cardano development since 2020
- Plutus/Haskell development
- Quality Assurance testing
- Security and voting auditing
- Enterprise founding member of IntersectMBO
- Trusted development partner of IOHK (Input Output)
- Strategic continuity partner of IntersectMBO

12+ Years in Web3	**7+** Years in Cardano
5+ Dev Years on Cardano	**10+** Team size

📍 Global reach
Dutch HQ and cost effective off-shore development

Excellence • Integrity • Innovation

TRUSTED BY INDUSTRY LEADERS

IOHK	Intersect MBO
Partnership since 2020	Continuity Partner since 2024

IOHK
- Plutus/Haskell development partner
- Plutus blueprint templates, NFT marketplace and stable coin
- Contributed to Vasil hard fork, QAT
- Cryptographic Primitives, QAT
- Handling Plutus Community tickets

Intersect MBO
- One of the first Enterprise Members
- Contributed to Open Source Policy document
- Working group participation: Open Source, Governance and Utility & Commercialization
- Chang hard fork, Voting audits, QAT Gov.tools
- Oversight committee treasure withdrawals

Excellence • Integrity • Innovation

COMPREHENSIVE WEB3 DEVELOPMENT SOLUTIONS

SMART CONTRACT DEVELOPMENT

Aiken, Helios, Plutus and Solidity expertise for robust blockchain applications

QUALITY ASSURANCE & AUDITING

Manual, automatic, and performance testing with top-tier security focus, smart contract and governance voting audits

INFRASTRUCTURE SOLUTIONS

AWS, Google Cloud, Microsoft Azure, Kubernetes, Docker Swarm deployment

PROGRAMMING EXCELLENCE

Haskell, Rust, TypeScript, React, Go, C++, Java, Kotlin, Flutter capabilities

ADVANCED SECURITY TESTING

Pen-testing, Application Security testing, Web application Security testing, API Security testing, Security Audits, Static & Dynamic testing

AI INTEGRATION

Agents and LLM implementation for next-generation solutions and Enterprises

Excellence • Integrity • Innovation

PIONEERING CARDANO'S DEMOCRATIC FUTURE

CIP-1694 IMPLEMENTATION

Contributor to Cardano's liquid democracy governance framework enabling on-chain voting

GOV.TOOLS DEVELOPMENT

Created open governance tool as part of governance consortium for Cardano community participation

CONSTITUTIONAL CONTRIBUTION

Participated in governance since CIP-1694, contributing to Cardano's constitutional development and working groups

OVERSIGHT COMMITEE

Active member providing checks and balances for treasury withdrawals via smart contract framework

Excellence • Integrity • Innovation

OPEN SOURCE INNOVATION EXCELLENCE

CARDANO MARKETPLACE

A simple NFT marketplace for minting, buying and selling of digital assets, extracted and open sourced from our full-featured NFT platform (former Artano) which includes English auction and iNFT capabilities

KUBER / KUBER IDE

Comprehensive JavaScript and Plutus/Haskell library for normal and governance transactions, Hydra transactions under development / Web-based smart contract development and deployment tool lowering barrier of entry, Plutus V3 ready with no infrastructure hassle

MEMPOOL EXPLORER

Innovative tool providing real-time Cardano transaction flow visibility and blockchain interaction optimization

Excellence • Integrity • Innovation

OPEN SOURCE INNOVATION EXCELLENCE

CARDANO TEST WALLET

Test wallet integrated with Playwright for end-to-end testing

AUTONOMOUS AGENT TESTING (AAT)

Testing Framework for CIP-1694 testing at scale, enhancing for DApp testing at scale use of LLM

Open source repositories
https://github.com/dQuadrant and https://github.com/cardanoapi

Excellence • Integrity • Innovation

PROJECT CATALYST AND COMMUNITY IMPACT

PROJECT CATALYST

10+	5	5+
Proposals	Funded	Self-Funded

FUNDED

- Business contracts
- Smart mint - DIY evolving NFTs (Artano)
- Mempool Explorer
- Autonomous Agent Testing - CIP 1694
- Kuber API - Hydra integration

Excellence • Integrity • Innovation

PROJECT CATALYST AND COMMUNITY IMPACT

COMMUNITY IMPACT

- DevEx expansion through community-funded and self-funded open source solutions like Kuber Hydra Integration and Autonomous Agent Testing for testing CIP-1694 at scale. Recognized by Cardano Foundation for outstanding open source contributions.

Excellence • Integrity • Innovation

PROVEN TECHNICAL EXCELLENCE & ACHIEVEMENTS

HARD FORK QA TESTING

Successfully tested multiple Cardano hard forks including Vasil and Chang ensuring network stability

PLUTUS DEVELOPMENT

Created Plutus blueprint templates and alternative solutions for Plutus Application Backend (PAB) Kuber and developer friendly environment KuberIDE

CRYPTOGRAPHIC PRIMITIVES QA TESTING

Advanced testing and validation of SECP256K1 and other cryptographic implementations

AUDITING

From smart contract to governance voting audits and oversight for Cardano treasure withdrawals

GOVERNANCE

Gov.tools, AAT of CIP-1694 and auditing

Excellence • Integrity • Innovation

WHY CHOOSE DQUADRANT AS YOUR DEVELOPMENT PARTNER?

PROVEN EXPERTISE

12+ years in Web3 development with 7+ years of deep Cardano specialization and ecosystem contribution

TRUSTED RECOGNITION

Officially recognized and trusted by IOHK, IntersectMBO as reliable development partner

END-TO-END SOLUTIONS

Complete service offering from strategic consultation to deployment, maintenance, and ongoing support

GLOBAL ADVANTAGE

Netherlands expertise combined with cost-effective offshore development facility providing competitive pricing

INNOVATION LEADERSHIP

Active contributor to open source projects, governance tools, and cutting-edge blockchain solutions

Excellence • Integrity • Innovation

LET'S BUILD THE FUTURE TOGETHER
